JEWELLERY NEWSLETTER

MAY 2011

SPRING HAS SPRUNG! Hi. I am back in Chelsea after visiting our daughter in Brisbane, Australia. What a beautiful city with so many art opportunities. I was inspired by the many galleries, craft markets, jewellery studios and of course, the sunny warm weather. I'm happy to be back in my studio, however, ready to try out some new and exciting designs. My website, www.susanglazer.ca has been updated, thanks to our other daughter. Check it out!

VISIT MY STUDIO Back by popular demand, I will have regular studio hours on Sunday afternoons, from 1 – 5 pm. Please call to set up a time to look for something special. New gift ideas.

WEAVING The collection featured above, is hand-woven with strips of fine silver. By weaving in metal, I can create a fabric which can then be manipulated into the shape I want. These pieces were woven free-form, but I could also weave metal on a loom. Endless possibilities!

FACTS ABOUT WEAVING

- Weaving is the interlacing of two separate elements
- The warp is set down in parallel strips
- The weft is the element which interlocks the warp crossways, creating a stable structure
- Basic weaving was invented around 5000 BC
- Weaving by hand is labour intensive
- Looms began to be mechanized during the Industrial Revolution, around 1785

CALENDAR OF EVENTS

CROCHET IN METAL

Explore the possibilities of crocheting with metal wire instead of wool. Learn how create a necklace and bracelet. Add beads to your project for a lovely decorative element.
